

# NGUYEN VAN MINH

## SOFTWARE DEVELOPER INTERN

(+84) 353 999 798 | nvminh162@gmail.com | nvminh162.id.vn

An Nhon Ward, Ho Chi Minh City, Vietnam

### SUMMARY

---

Final-year Software Engineering student with hands-on experience developing full-stack web and enterprise-oriented applications using Java, Spring Boot, React.js, Next.js, PostgreSQL, MySQL, and MongoDB, with foundational knowledge of Python. Familiar with OOP, MVC, ORM, RESTful APIs, responsive user interfaces, authentication and authorization, database-driven systems, frontend-backend integration, Git, Docker, AWS deployment, and AI-assisted features. Interested in contributing to enterprise management software and developing practical skills in ERP system integration through real-world projects.

### EDUCATION

---

**Industrial University of Ho Chi Minh City (IUH)**

**Ho Chi Minh City, Vietnam**

Major: Software Engineering

Sep 2022 – Present

GPA: 3.2 / 4.0

### SKILLS

---

- **Programming Languages:** Java, Python, JavaScript, TypeScript, SQL
- **Frameworks/Platforms:**
  - React.js, Next.js, React Native, Redux Toolkit, Zustand, TanStack Query, HTML5, CSS3, Tailwind CSS
  - Spring Boot, Spring MVC, Spring Security, Spring Data JPA, WebSocket, Hibernate
- **Database:** MySQL, MariaDB, PostgreSQL, MongoDB, Redis
- **DevOps & Cloud:** Docker, Git, GitHub, GitLab, GitHub Actions, AWS
- **Others:**
  - OOP, MVC, ORM, RESTful APIs, frontend-backend integration, software testing, and debugging
  - Teamwork, communication, analytical thinking, troubleshooting, code quality improvement, and Agile/Scrum collaboration
  - English: Reading technical documentation

### PROJECTS

---

**Aurora Hotel Management System**

**Team size: 4 | Role: Full-stack Developer**

- **Description:** Enterprise hotel management platform with multi-branch operations, booking workflows, revenue dashboards, staff scheduling, VNPay payments, role-based access control, and an AI-powered RAG chatbot using Google Gemini.
- **Technologies:** Spring Boot, LangChain4j, PostgreSQL, pgvector, React.js, Redux Toolkit, Tailwind CSS, Docker, GitHub Actions, AWS
- **Responsibilities**

- Built responsive admin/customer web interfaces with React.js, Redux Toolkit, and Tailwind CSS for hotel operations, booking flows, dashboards, and management modules.
- Implemented JWT access/refresh authentication, token introspection/invalidation, OAuth2 resource server, and role-based authorization with 5 roles and 70+ permissions.
- Integrated an AI-powered RAG chatbot using Google Gemini, LangChain4j, pgvector semantic search, document upload and chunking, and streaming responses.
- Deployed the application to AWS EC2 using Docker Hub and GitHub Actions CI/CD pipelines.

● **Repository:** <https://github.com/nvminh162/aurora-hotel-management-system>

## Nexatech E-commerce – Microservices

**Team size: 4 | Role: Full-stack Developer**

- **Description:** A microservices e-commerce platform for PC hardware with authentication, inventory management, order/payment workflows, flash sales, event-driven processing, and customer/admin web interfaces.
- **Technologies:** Spring Boot, Kong Gateway, Keycloak, Kafka, PostgreSQL, MongoDB, Redis, Next.js
- **Responsibilities**
  - Implemented Keycloak-based authentication including login, registration, token refresh/logout, social login support, password recovery, and session revocation.
  - Integrated Kafka-based audit events with centralized MongoDB storage, filtering, pagination, trace lookup, and business-flow investigation support.
  - Built Kafka consumers for user, order, payment, and inventory events, along with in-app notification APIs, email delivery preferences, and scheduled retry handling.
  - Built a role-based admin dashboard with React.js, Redux Toolkit, and Tailwind CSS for user, product, order, payment, and internal operation management.
- **Repository:** <https://github.com/nvminh162-archive/nexatech-ecommerce>

## Library Management System – Microservices

**Individual Project | Role: Backend Developer**

- **Description:** Backend management system built with six Spring Boot microservices, CQRS, Event Sourcing, Axon Framework, AxonServer, Kafka messaging, and a Borrowing Saga for cross-service transaction orchestration.
- **Technologies:** Spring Boot, Kong Gateway, Axon Framework, AxonServer, Kafka, PostgreSQL, Redis
- **Responsibilities**
  - Built six Spring Boot services with Netflix Eureka service discovery and Kong Gateway routing.
  - Implemented CQRS using Axon Framework and AxonServer, including event streams, audit history, and point-in-time recovery.
  - Built a Borrowing Saga to validate borrowing rules and roll back failed cross-service transactions.
  - Integrated the AxonServer dashboard to monitor message queues, cache state, and the event store.
- **Repository:** <https://github.com/nvminh162/backend-library-system>

## AWARDS

**Academic Excellence Scholarship - Partial (50%)**

**2024 - 2025**

Industrial University of Ho Chi Minh City | Academic Year GPA: 3.42/4.0
