

NGUYEN VAN MINH

Full-stack Developer Intern

(+84) 353 999 798 | nvminh162@gmail.com | nvminh162.id.vn

An Nhon Ward, Ho Chi Minh City, Vietnam

SUMMARY

Final-year Software Engineering student with a strong foundation in full-stack web development using Java Spring Boot and React.js. Experienced in building RESTful APIs, responsive web applications, database-driven systems, and collaborating in team projects using Git and Agile practices. Passionate about writing clean, maintainable code and eager to learn new technologies while contributing to real-world software development projects as a Full-stack Developer Intern.

EDUCATION

Industrial University of Ho Chi Minh City (IUH)

Ho Chi Minh City, Vietnam

Major: Software Engineering

Sep 2022 – Present

GPA: 3.2 / 4.0

SKILLS

- **Programming Languages:** Java, JavaScript, TypeScript, Python, SQL
- **Frameworks:**
 - Spring Boot, Spring MVC, Spring Security, Spring Data JPA
 - React.js, Next.js, Redux Toolkit, HTML5, CSS3, Tailwind CSS
- **Database:** MySQL, PostgreSQL, MongoDB
- **Tools:** Git, GitHub, Docker
- **Others:**
 - Object-Oriented Programming (OOP), RESTful APIs, Database Design
 - Testing & Debugging, Agile/Scrum, Team Collaboration
 - English: Reading technical documentation

PROJECTS

Aurora Hotel Management System

Team size: 4 | Role: Full-stack Developer

- **Description:** A full-stack hotel management platform built with Java Spring Boot and React.js, featuring booking workflows, role-based access control, and database-driven dashboards.
- **Technologies:** Java, Spring Boot, Spring Security, Spring Data JPA, PostgreSQL, React.js, Redux Toolkit, Tailwind CSS
- **Responsibilities**
 - Built responsive admin and customer interfaces with React.js, Redux Toolkit, and Tailwind CSS for hotel operations, booking flows, dashboards, and management modules.
 - Developed RESTful APIs with Spring Boot and Spring Data JPA for booking, room, branch, service, and user management with clean, maintainable code structure.

- Implemented JWT-based authentication and authorization with 5 roles and 70+ permissions using Spring Security and Object-Oriented design patterns.
- Designed relational database schema with PostgreSQL, optimized queries, and collaborated with the team using Git and Agile practices.

• **Repository:** <https://github.com/nvminh162/aurora-hotel-management-system>

Chatly Social Platform

Team size: 4 | Role: Full-stack Developer

- **Description:** A real-time social networking platform with private/group chat, social feeds, stories, and cross-platform web and mobile clients, built with Java Spring Boot and React.js.
- **Technologies:** Java, Spring Boot, Spring Data JPA, WebSocket, PostgreSQL, MongoDB, React.js, Zustand
- **Responsibilities**
 - Built responsive social UI components for feeds, conversations, real-time chat, stories, and reels with React.js and reusable component architecture.
 - Developed RESTful APIs and WebSocket endpoints with Spring Boot for messaging, user management, notifications, and content features.
 - Designed and implemented hybrid database architecture using PostgreSQL for relational data and MongoDB for document-based chat storage.
 - Collaborated with a team of 4 using Git branching strategies, code reviews, and Agile sprints to deliver features incrementally.
- **Repository:** <https://github.com/nvminh162/chatly-social-platform>

Library Management System – Microservices

Individual Project | Role: Backend Developer

- **Description:** A Java Spring Boot microservices system for library operations with service discovery, API gateway routing, event-driven workflows, and PostgreSQL persistence.
- **Technologies:** Java, Spring Boot, Spring Data JPA, PostgreSQL, Redis, Kafka, RESTful API, Docker
- **Responsibilities**
 - Built 6 Spring Boot microservices with RESTful APIs for book, employee, user, borrowing, and notification management using Object-Oriented design principles.
 - Designed relational database schemas with PostgreSQL and Spring Data JPA, implementing proper entity relationships and query optimization.
 - Implemented service discovery with Netflix Eureka and API gateway routing for centralized request handling and clean service communication.
 - Developed event-driven borrowing workflows with validation rules, cross-service transaction handling, and automated notification delivery.
- **Repository:** <https://github.com/nvminh162/backend-library-system>

AWARDS

Academic Excellence Scholarship - Partial (50%)

2024 - 2025

Industrial University of Ho Chi Minh City | Academic Year GPA: 3.42/4.0
